

# SCA Advanced 5 Week Training Program:

## *The Hardcore*

This program is for those with a solid base of fitness. You train most days of the week, which includes resistance training, high intensity cardiovascular exercise and you may find yourself competing in events. You enjoy pushing your limits.

### Before you start:

- Always warm up before starting any exercise. A 5-10min brisk walk, include a few drills to warm up the legs. Walk on your toes for 4 steps and then on your heels for 4 steps, repeat this for 1-2mins. Followed by 10-20 stationary squats, a few stretches and you are ready to go! <https://youtu.be/61VGVZQYfE8>
- Find a set of stairs with 100+ steps.
- Keep a record of each session, recording how many laps you complete in the specified time.
- If a railing is available, USE IT! It takes a small amount of weight off the legs resulting in better overall stamina.
- Avoid stair climbing on consecutive days, as the legs and lungs need time to recover.

Week 1	Day 1	Day 2	Day 3	Day 4	Day 5	Day 6	Day 7
<b>Session</b>	Stair Climbing	Gym	Cycle/Spin/Swim or group fitness	Gym or Rest	Stair Climbing	Rest	Cycle/Jog

Week 5	Day 1	Day 2	Day 3	Day 4	Day 5	Day 6	Day 7
<b>Session</b>	Rest	Swim/cycle Easy run	Rest	Stair Climbing	Easy Cycle	Rest & Recover	Race Day!
<b>Description</b>		30-40mins		20-30mins Walk x1 Doubles x1 Run 50 stairs x3 repeat	20-30mins		

- When running becomes too difficult, don't be afraid to walk - you can still cover good ground with a solid walking pace.
- Your mind will want you to stop before your legs & lungs - TAKE CONTROL; stair climbing can build a mental strength unlike any other
- Taking two steps at a time may allow you to cover more ground in less time.
- You may experience delayed onset muscle soreness in the 24-48 hours after exercise.
- Take it slow and gradually build up the amount of stair training each week.
